

Geography

Coasts

- Name and locate geographical regions of the UK, identifying key topographical features and land-use patterns.
- Understand some of the physical processes in coastal erosion.
 - To recognise that coastal areas change over time.
- To understand that the change has both negative and positive effects on human activities.
- To identify how activities in coastal areas may improve or damage the environment.
- Select a map for a specific purpose (eg. atlas to locate coastal landforms; OS map to find features in Llandudno; simple GIS software to look at land-use in a locality)
 - Find and recognise places on maps of different scales.
 - Develop using higher viewpoints up to satellite
