

What have I previously learned?

- Measure, compare, add and subtract lengths (mm cm m); mass (kg g); volume/capacity (l ml)

Prompts to help me in my learning

Vocabulary - Goldilocks words

Word	Definition
area	Total space taken up by a flat surface or shape
perimeter	Closed path outlining a shape
length	the measurement of something from end to end
width	The measurement of something from side to side
rectilinear	Made up of straight lines
Right angle	An angle of 90 degrees - a 'square corner'.

Area and Perimeter

Area is the amount of space inside a 2D shape.
Perimeter is the total **distance** around the outside of a 2D shape.

Measuring Area

We can count **squares** to find the **area** of a **rectilinear** shape.

Units of Measure for Perimeter

km	1 kilometre = 1000 metres
m	1 metre = 100 centimetres
cm	1 centimetre = 10 millimetres
mm	

Rectilinear Figures

A **rectilinear** figure is a 2D shape whose sides all meet at **right angles** (90°).
