

What have I previously learned?

- *Recognise, find and name a half as one of two equal parts of an object, shape or quantity.
- *Recognise, find and name a quarter as one of four equal parts of an object, shape or quantity.

Vocabulary - Goldilocks words

Word	Definition
Fraction	A small or tiny part, amount, or proportion of something.
Non-unit fraction	A fraction where the numerator (the number on the top half of the fraction) is greater than 1.
Numerator	The numerator is the number above the line in a fraction.
Denominator	A denominator is the bottom number in a fraction.
Equivalent fraction	Two or more fractions that are all equal even though they different numerators and denominators.
Whole	If the top number and the bottom number of a fraction are the same, then the fraction is equal to 1

Prompts to help me in my learning:

Unit Fractions

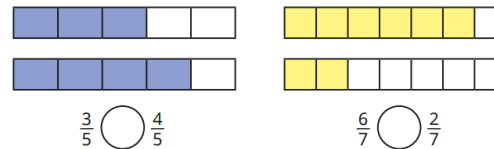

Comparing unit fractions

Write < or > to compare the fractions.

Comparing non unit fractions

Write <, > or = to compare the fractions.

Fractions on a numberline

Brett labels a number line to show fractions.
