

Computing Vision Statement 2022

Computing today is an essential part of everyday life and will play an immense part in our children's futures. Alexandra Park Junior School will provide our children with the necessary skills, creativity and enthusiasm to survive in an ever-growing computing dependant world.

Each child will be taught how to use the Internet in a safe and respectful way. They will understand what precautions to take when they find themselves in difficult situation and will also know where to seek help. Whilst they are in school no child will feel unsafe and threatened when using the internet. Children will also utilise the Internet efficiently to enhance their learning of all subjects. The school will provide an affluent bank of curriculum-based resources for children.

Our aim is to raise the standards of achievement in computing eventually exceeding the national expectations. Alexandra Park have invested in and will utilise up to date technology in order to help raise these standards across all year groups. Children will be able to write and debug code successfully and with confidence, using scratch. All staff will eventually be confident users and teachers of all relevant software and hardware available.
